

REMARKS

This Amendment after Allowance is responsive to the Notice of Allowance mailed July 11, 2006. The need for these very minor edits only became apparent to the undersigned on or about August 4 during a final review of the application text. None of the present amendments of the specification give rise to new matter or should necessitate further substantive review of the application. The foregoing claim amendments are being made merely to correct incorrect reference numeral usage, or to improve the readability of the specification from a grammatical perspective.

Entry of the present amendment is therefore respectfully requested.

Respectfully submitted,

Dated: August 14, 2006
